

ROVERS

MAGAZINE

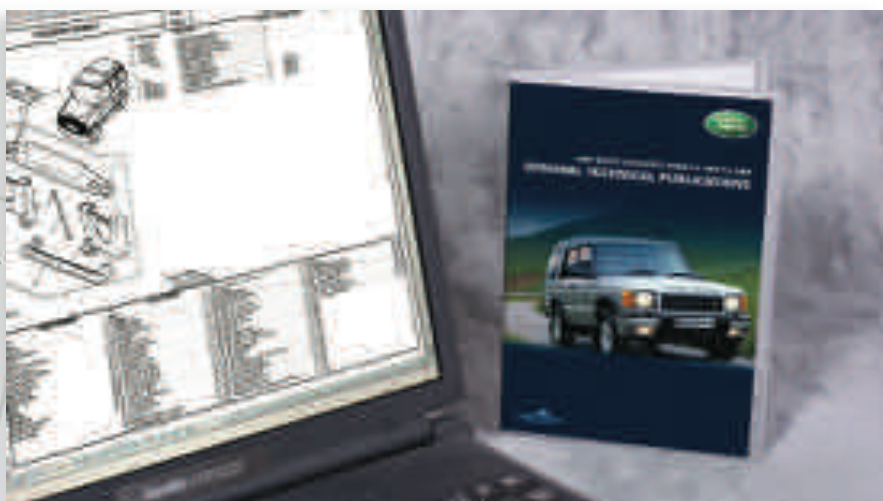

Original Land Rover Technical Publications

The most comprehensive compilation of Land Rover factory information available by vehicle model ever released to the public.

Compiled on easy-to-use DVDs for fast and accurate technical referencing. Each DVD includes; parts publications, service publications, owner's handbook and all relative published information by Land Rover for each vehicle.

When applicable the DVDs will also include; audio and navigational handbooks, special service tool manuals, labor times, Testbook user manual, T4 diagnostic system user manual, on-board diagnostic handbook, electrical troubleshooting guide, pre-delivery inspection, sales brochure, accessories brochure and fitting instructions. All combined in one easy-to-use DVD set for your Land Rover.

Summer rewards most of us with sunshine and warmth after the storms of this past winter and spring. While we hope that you're enjoying some time off with your Land Rover, we're delighted to share the exciting happenings in the Land Rover community.

Fun in the sun certainly arrived early at the first "Sand Rover Rally", a Florida event so entertaining that it took two correspondents, Sarah Hamilton and Rebekah Gleaves

Sanderlin, to cover. The heritage of Land Rovers has always included their off-road prowess in far-flung places. For Zack Griswold and me, that meant trading New England blizzards for Texas warmth at SCARR, the South Central Area Rover Rally, organized by Texas Rovers. Zack and I enjoyed the camaraderie of hundreds of Land Rover enthusiasts from Texas and surrounding states. We had a ball, and the off-roading—well, you can see how much fun we had from Zack's photos. The event also proved exciting for many new enthusiasts of all ages who tackled trails for the first time.

This issue of *Rovers Magazine* features two prototypes, starting with the latest Discovery V Concept Car, introduced at the New York International Auto Show with Land Rover's legendary aplomb. We also learned of Land Rover's partnership with Virgin Galactic. Who knows—maybe Rovers North will one day deliver parts by spaceship? The Discovery V dazzled the hundreds of participants at its "Launch Event," but nothing prepared us for the delight of Jim Macri and Glenn Parent recreating the storied Centre Steer prototype in Vermont. Glenn's story chronicles their travels in the UK to research the vehicle and follow in the footsteps of Maurice Wilks in creating the first Land Rover prototype.

On the subject of new enthusiasts, we think you'll enjoy the experience of Dan Lord, W. Newbury, MA in getting his 109" back on the road. A Land Rover also played a role in helping a young Texan meet a member of the British royal family who participated in the Race Across America, raising money for a UK cancer fund. We were also able to help a Green Oval Brit source a Land Rover for his wedding in New York City this spring. Christopher Pullen chronicles his Texas Rovers' group adventure in Utah, under Bill Burke's leadership.

Looking towards the future, Rovers North continues to invest in its infrastructure and staff to assure enthusiasts of quality support for their heritage Land Rovers. We're very excited about welcoming a product development specialist to our staff so we can maintain the critical parts inventory essential for getting the most out of your Land Rover. We've also invested in our building, a converted barn, through the installation of a solar power system to meet our long term energy needs.

These are exciting times for Land Rover enthusiasts and we're thankful that you let Rover North contribute to your Land Rover experience. Just as you invest in your Land Rover, we invest in the product knowledge, inventory, information and systems that assure you of support for your Land Rover for decades into the future. Our Land Rovers get used for work, travel and off-road adventures; we're pleased that you've chosen to let Rovers North help you get the most from your Land Rover. 

Jeff Aronson
Editor, *Rovers Magazine*

Our mission is to support all original Land Rover models that are no longer supported

by your local Land Rover franchise. We offer the entire range of Land Rover Genuine Parts direct from Land Rover UK, providing the highest quality parts and accessories at the best prices. In addition we offer our own line of parts called ProLine. Sourced from a variety of manufacturers, ProLine is our alternative when a Genuine Part is no longer available or a lower cost replacement is preferred. Visit our website www.roversnorth.com for a more complete view of our selection, or call us. All new parts and accessories sold by Rovers North are covered by our one year unlimited mileage warranty. We invite you to experience our knowledge, products and friendly service. Thank you for choosing Rovers North.

Bill Burke leads Texas Rovers through Utah.

Fuel Pump, Defender 90 NAS, Genuine...RNE131 \$ 396.95

FABULOUSLY BRITISH

By Jeffrey Aronson

Matt Hull, Bolington, Cheshire, England, faced a problem identifiable to any Land Rover enthusiast. While he was excited by the upcoming wedding to his fiancée, Wendy Elliot in, New York City, he faced the terrifying prospect of a wedding carriage that might not be a Land Rover.

So he contacted Editor Jeff Aronson through his website, www.landroverwriter.com, and explained his predicament. "I am getting married in New York on the 29/5/2014 and am desperately looking for a specific wedding car. As a massive Land Rover Defender fan, current owner of a 2010 Defender 110 Puma and past owner of a 1984 MoD 110 soft top, 1998 90 200tdi and 1997 110 300tdi, I am trying to find a Defender or earlier to take us to our wedding. Is it possible you could put me in touch with anyone that you know in NYC that may be able to assist with this?"

The word went out on the Rovers North/*Rovers Magazine* Facebook page and New York City area Land Rover enthusiasts on this side of the pond, Daniel Marcello and Robert Wollschlager, leapt forward to offer their vehicles as proper wedding transport. Robert's Stage One V8 109 provided the requisite extra room for the wedding party and he found himself invited to join in the celebration. Matt wrote us to say, "The day was just perfect and all the guests were surprised by the Land Rover which was just perfect." Congratulations to Matt and Wendy, and thanks to Robert and Daniel for being Fabulously British!

SCARR 2014

The Ayes of Texas

Story by Jeffrey
Aronson Photos:
Zack Griswold and
Jeffrey Aronson

It's February 21st, 18 degrees Fahrenheit outside, and a few feet of snow cover the entire state of Maine. I've just burned up another forest in the woodstove, trying to get the indoor temperature above 60. Deliverance comes in the form of an email; would I like to attend SCARR 2014 the following month? The weather prognosticators predict sunny days and temperatures in the 70s. You can guess my response.

SCARR, the South Central Texas Rover Rally, started up small in 2003, but has grown in popularity to become one of the larger Land Rover events in the country. It offers the ideal mix of terrific off-roading challenges, comfortable on-site camping, conviviality, great food, the refreshing sight of hundreds of stock and kitted-out Land Rovers—and it takes place in Texas.

That means this Yankee gets to experience Texas hospitality. So when club officials/event volunteers Christopher Pullen, Kevin Didion, Jake Dearborn, Ciaran Stephenson, Jim Edson, Sarod Dhuru and Laura Shacklette indicate they'll handle arrangements for you in Texas, they mean it. Rovers North's Zack Griswold flew in from Vermont and SCARR volunteer Gavin Kwait met him in Dallas to bring him to the event. My flight left from Portland, ME, and when I arrived at DFW, I found Joey and Jordyn Pitts, with their two wonderful dogs and their kitted-out Discovery II, waiting for me as promised. The Pitts live in Paradise, TX, about an hour west of Dallas. They thought nothing of sitting at DFW, waiting for my flight, before driving another two hours east to SCARR; I felt like a celebrity.

SCARR takes place at the Barnwell Mountain Recreation Area in Gilmer, TX. It offers 27 miles of trails within its 2,000 acres. A covered pavilion assures a meeting and dining spot, but it's big enough to require some careful organization to keep track of the nearly one hundred Land Rovers and hundreds of enthusiasts in attendance. They came from Texas, Oklahoma, Mississippi, Arkansas, New Mexico and Colorado and infused the event with energy. Ages ranged from elementary school to retirees, but what brought them together was their shared enthusiasm for the marque.

A Yankee can learn a lot at SCARR. The first comes when he sees the Land Rovers themselves. Apparently, magical places exist where rust does not appear. That means that you'll see 41 Discovery I's and Discovery II's, 11 Range Rovers, 6 Defenders, 10 LR3/LR4's and even 4 Series Land Rovers—without their owners having spent a penny on rust repairs. Instead, those funds can go

to the inevitable kitting out of vehicles.

Whereas my Land Rover bank account goes to replacement door tops and door skins, theirs goes to winches, shackle kits, suspension upgrades, lift kits, roof racks, lights, jerry cans, you name it. Oh, and the average price of gasoline is 30 cents less than in New England.

You also discover that camping can be comfortable, especially when your hosts have arranged for you to occupy a simple, but air-conditioned, WiFi equipped cabin, while photographer Zack Griswold endures a bargain hammock—in the rain. Tom Pennington, Paradise, TX, erected his two-story "Tent Mahal" behind his Discovery II. Laura Shacklette, Plano, TX, actually had twin fans hooked up in her tent. Barnwell Mountain has several camping areas, all beautifully sited for proper drainage, but also nestled in the pines to provide tie downs as well as shade.

You learn that March weather need not mean snowstorms, as in New England. East Texas threw the gamut of weather (hot, muggy, dry, hail, thunderstorms, rainbows) at us over the long

Background: Michael Law of North Texas British eases through a twisty section in Allen Avery's Range Rover Classic. Photo: Zack Griswold

Top: Maximillion Mawle and Diane Rose descend in their 1969 Series II-A, Texas hospitality is real.

A team effort recovered a Discovery I.

weekend, but largely the conditions remained warm (to me) and dry. That meant you could ascend or descend very steep, narrow trails without much slipping and sliding. The soft yet firm soil also provided terrific traction. Whereas in New England an incline usually provides a sluiceway for water, meaning slick rocks or muddy ground, the 45+ degree inclines at Barnwell rarely caused a slip. However, most every trail had some off camber moguls that challenged drivers, including one whose Discovery I tipped onto its side on a steep incline. A team effort at recovery, led by Darrell Oliver, righted the Discovery with only a popped-out rear window and dented rear quarter panel for damage. Once the oil had been removed from its air cleaner, the Discovery started right up and continued along the trails. Oh, and if you wanted mud, Barnwell Mountain featured a fabulous mud pit that consumed some winches before releasing a Range Rover Classic.

You discover that Texas can treat visitors quite well. While one team volunteered to serve as trail leaders, a few poor souls got stuck with me. For the first time, I went off-road in an '05 LR3, courtesy of Sarod Dhuru. The Los Angeles native, now living in Fort Worth, started out in Freelander SE3 and moved into a '98 Range Rover P38-A before purchasing his LR3. Lane Collier took me around in his stunning Range Rover Classic [which would rupture a radiator hose over the weekend]. I enjoyed time poking around with JD and Sarah Crossland, of Corpus Christi, in their Discovery II, kitted-out with kids, dogs and suspension upgrades. Ciaran Stephenson had just picked up his LR4 before trying it off-road for the first time. Mike and Shailaja Barnett, Little Rock, AK, came in their '89 Defender 110 [200 Tdi-powered] and their children Riya, Jaiden and Shaan. Mike grew up in Kenya, where his folks were missionaries and teachers. "You can't grow up in Africa and not have a love for Land Rovers," he noted. If anyone frowned all weekend, I never saw it.

Exciting off-roading, Tex-Mex food, informative off-road clinics with Bill Burke, hundreds of genuine Land Rover enthusiasts, engaging scenery and weather—that's SCARR. Lyle Lovett once sang "That's right, you're not from Texas." He's right—I'm not—but after SCARR, I do understand why people want to claim otherwise. If it's not on your calendar, consider changing it for 2015. 

Dusty Duncan's Discovery is rescued by Jacob Dearborn, Bryan Herrin, Marty Koning and Arto Pullinen

Above L-R: Fun Zone camp; Series II-A's first SCARR; Mike and Shailaja Barnett and family; wonderful rainbow and Dusty Duncan relaxes with his Discovery II.

Land Rover Frisco

SCARR receives financial assistance from the Snell Auto Group, which operates Land Rover dealer franchises in Dallas, Austin and Frisco. I took the opportunity to meet Mike Mykeloff, the GM of Land Rover Frisco, as he's often participated at Texas Rover events.

Mike spent 13 years at Land Rover North America, traveling extensively in the southeast and far west, with stops in Atlanta and Land Rover Nashville. When the intrusion on his family life became too great, Mike decided to accept an offer from Snell to oversee Land Rover Frisco 18 months ago.

He says the best part of working around Land Rovers "is the brand itself. It has a halo around it unlike any other brand. It's inspirational and adventuresome—everyone wants a Range Rover or Land Rover! Owners become enthusiasts quickly." Mike demonstrated his affection for Land Rover by opening a plastic tote under his desk. There resided Defender brochures from the 1990s, a Holland and Holland

special edition pamphlet, commemorative plates from events such as the Great Divide Expedition, decals and dealer trinkets from decades ago.

He fondly recalls taking his Range Rover Sport to the Arkansas Land Rover Rally and pushing it hard through the giant mudhole. For his daughter, he purchased a '95 County LWB, "a tank with airbags;" when his insurance company wanted to total it after an accident, Mike had it rebuilt instead. While he could not attend this year's SCARR, he has enjoyed the event "very much" in previous years.

As with Land Rover dealers nationally, the greatest challenge is getting enough vehicles to sell and limiting the number purchased in the US for immediate export to other markets. "I only have three or four Land Rovers in stock right now," Mike says. His customers really need their Land Rovers, Mike noted, pointing to an LR4 outside the dealership. "The owner tells me that when he hears bears rustling outside his house, he steps into his LR4 and turns on the lights to scare them away."

Love ruins objectivity. The 109" had a seized engine, rotted frame, dry rotted tires, broken leaf springs, no gas tank or brakes. Also, taped plastic substituted for the missing glass in a door top. What more could a man want?

I resolved to keep this antique as original as possible, but first I had to find the commission [VIN] number. On Super Bowl Sunday I never watched the game. I had read every book and manual for location instructions. Without a number I would face a legal quagmire registering this vehicle for the road. Using my drill and sanding attachment to clean every inch of the frame, three bone-chilling hours later, I had found nothing. It would take another month before I discovered the critical number on the underside of the right front fender. Of course, I later realized that British car literature refers to "driver's side" and "passenger side" in opposite directions to most of the rest of the world. The good news was

First Impressions:

What's Love Got To Do With It

By Dan Lord

[A native of St. Stephen, NB, and Maine, Dan and his wife JoHannah have spent 44 years in antique restoration. They currently live in West Newbury, MA, in the 1659 "Mood House", along with their 1960 109" Series II –ed.]

1960 Land Rover Advertisement.

“Go-anywhere cross country transport for 12 people! Here, in one vehicle, you have car-comfort, 3-car capacity, plus Land-Rover toughness, reliability and performance—and all for £950!”

Country Life—September 6, 1962.

that I had a chassis number which identified the Land Rover as a 1960 Series II, not as the 1965 Series II claimed by the previous owner.

The local shop worked its magic in freeing the stuck crank with penetrating oil, and once it spun, saw 60 psi on the oil pressure gauge. Shortly after, with the engine now running and the brakes functional, I flat-bedded it home.

In April, I began the arduous process of vacuuming the residue of birds, snakes, mice and hornets. A shop vac did the trick for the top layers, but some snake skins, mouse droppings, bird refuse and rust flakes stubbornly clung to the Rover. Now things got serious. Dressed in my white paper coveralls, safety glasses and face mask, I hitched up the air nozzle to the air compressor and blasted out the entire truck. Step Two involved raking all the debris off the driveway.

After the initial cleaning, I confronted a collapsed front spring. When the replacement came from Rovers North, I attempted to remove the crusty bolts that held the spring to the Rover. A breaker bar, then a two-foot length of pipe, and finally, a five-foot lally column sleeve freed the spring. Using two jacks and the assistance of an old classmate (48 years earlier he had helped me with a Sunbeam Alpine), I maneuvered the spring into place. Another buddy who's a welder completed some frame repairs. My only request was that the wheelbase remained 109" on both sides, not 107" on one and 111" on the other. He even put in some hangers where the old ones looked questionable.

On another occasion, my son and I repaired a bent roof portion on the driver's side, damage done by a caved-in shed. First, we constructed a platform made of 5x5 fence posts with a beam inside the truck.

On this we mounted a jack, then heated the aluminum roof with propane torches to reshape the corner. The dent came out—it's not pristine, but perfectly adequate for a 1960 Station Wagon.

Next, I tried to wire the directional lights. Hello? I hunted inside the truck for any switch that could be a directional indicator and traced wires under the dash. Finally, I resorted to actually getting a wire diagram, which of course had no directionals indicated for a 1960 109" [Schematics never mentioned optional equipment; directionals were required for the US market —ed]. In 1960, people could also use their hands to signal a turn. Imagine—no hazard lights, seat belts, airbags, GPS or security systems—how did people remain alive? I wired up the directionals on a separate circuit and gave my hands a rest.

A compression test revealed three cylinders with 85-95 psi, but one cylinder with only 30 psi. A shop recommended I try Marvel Mystery Oil in the gas to help "free" the rings. I've tried fuel and oil additives before without any luck, so I remained skeptical, but I poured a

quart into the tank. After a lot of smoke during a dozen starts, the compression evened out and the cylinders felt spot on. Now I'm a believer in Marvel Mystery Oil; if they call, I will go on the road for them as a spokesman.

A test drive in the rain confirmed that only the passenger side wiper would work; my rebuilt wiper motor on the driver's side failed me. I returned home peering out of the opposite side of the windshield. I cobbled together another working motor from two spares. Now I can see through the 7" sweep of the tiny wiper blades. That same test drive revealed a high-pitched whine—actually, more like a siren—coming from around the gearbox. After unbolting the transfer case cover, I felt bone-dry gears. Five and a half pints of gear oil it ran with no untoward noises. I dodged a bullet on that one.

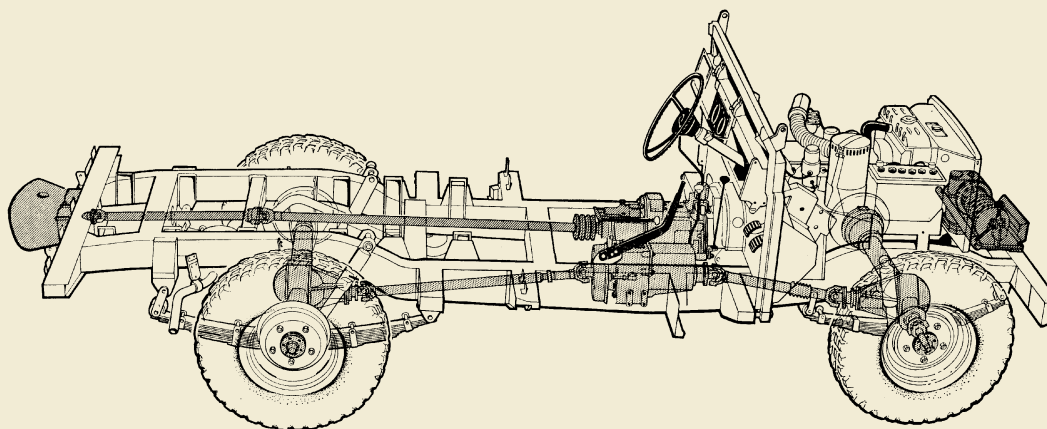

One of the strangest problems I encountered involved a perfect initial start up, but failed starts afterwards; the starter would engage and spin, but the motor would not fire up. I ran a wire from a plug wire and held it near the steel dash. Upon turning it over I could not see a spark. Then I tried the same exercise on the coil—no spark. A new coil resulted in no change. Then I remembered that when I was driving I had smelled burning wire for a short time. This brought me to the fascia. After opening it up and clearing away a nest, I found a burned-out terminal on the ignition switch. With a drill and an extremely small bit I put a hole in what was left of the terminal. Then I put a clip on the wire and drilled it as well. Then, taking a small self tapping screw, I attached the wire to the terminal. I turned the ignition switch, hit the start button and it started. The key in maintaining an old Rover is listening, smelling and seeing all that is taking place.

The Allstate AM radio wouldn't work. I took it to the radio/TV repair shop and asked what they could do. After being the brunt of jokes relating to saving a 54-year-old radio, an older guy from the back came forward and took control. A month later the Allstate came back working properly. Now, where to mount it?

I began using the truck locally around town, just to make sure all ran properly before I ventured too far from home. One Saturday in the late afternoon I took a quick run to get the newspaper; the Rover ran so well that I decided to stay out longer even though it had turned dark. Suddenly the engine bogged down and lost power, then immediately ran again. I pulled onto a side road and coasted to a stop in a wooded area, out of gas. I began to walk towards a house in the distance. A man in an old blue Buick stopped, rolled down his window as asked, "Son, is that a 109?" It's been a while since anyone called me son, but I answered "Yes." He asked, "What's wrong with her?" I told him I'd run out of gas and he offered me a ride. John, my new best friend, then proceeded to tell me how he and his wife had taken a 109" throughout France when they lived in Paris. He brought it back to the USA with him, but sold it when it developed a transmission problem. "I never should have sold it," John said ruefully, as he watched me fill the gas tank and start up my Land Rover.

I would not recommend anyone buy an abandoned farm work-horse '60 Series II station wagon unless you're unafraid of listening to your heart. ■■■

109" WHEELBASE 'LONG' CHASSIS

SERIES II, 1958-1961

Models

- 1958-1961 88-inch, 2286cc petrol or 2052cc diesel pick-up, with or without truck cab, with or without canvas tilt.
- 1958-1961 88-inch, 2286cc petrol or 2052cc diesel hard top.
- 1958-1961 88-inch, 2286cc petrol or 2052cc diesel Station Wagon.
- 1958-1961 109-inch, 2286cc petrol or 2052cc diesel pick-up, with or without truck cab, with or without canvas tilt.
- 1958-1961 109-inch, 2286cc petrol or 2052cc diesel hard top.
- 1958-1961 109-inch, 2286cc petrol or 2052cc diesel Station Wagon.

Engines

2286cc four-cylinder petrol, 77 bhp @ 4,250rpm and 124 lbs/ft @ 2,500rpm.
2052cc four-cylinder diesel had 51bhp @ 3,500rpm and 87 lbs/ft @ 2,000rpm.

Transmission

Single dry plate type, 9 in. diameter. Main gearbox: Four forward speeds, one reverse. Syncromesh: Top and third gears. Transfer gearbox: Giving a two-speed reduction on the output from the main gearbox. Selectable four-wheel or two-wheel (rear) drive in high range only; permanent four-wheel-drive in low range.

Suspension

Springs: Semi-elliptical type, underslung. Rubber bushes all round. Second leaves wound round shackle pin eye to give extra strength. Shock Absorbers: Monoromatic double-acting telescopic type.

Steering

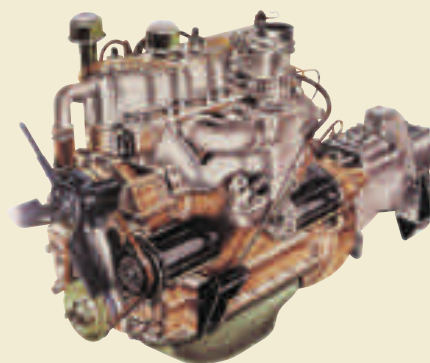

Burman worm and nut type with recirculating ball.

Brakes

Foot brake: Girling hydraulic. Drums all round; mechanical parking brake operating on the transmission output shaft.

Total Production of all models

110,074

The 2½-Litre overhead valve petrol engine develops 77 b.h.p. at 4,250 r.p.m. and has a torque of 124 lb. ft. at 2,500 r.p.m. Thus, there is abundant power available for vehicle operation, hauling trailers or driving machinery. Power that is smooth and willing for normal work: slogging, determined power for tough assignments. This is an outstandingly reliable engine, its robust construction giving it a long and trouble-free life.

1960 Land Rover Series II brochure.

The Holy Grail of Land Rover

By Glenn Parent

[Glenn Parent, Woodstock, VT, works as the restorer for enthusiast Jim Macri's High Meadow Farm, Saxtons River, VT. Together, they traveled to the UK to attempt the ultimate recreation of the first Land Rover prototype —ed.]

Jim Macri could restore most any British automobile he desires, but it's my good fortune that he's chosen to become an avid Land Rover enthusiast. His support has enabled us to purchase and restore a Series I, Series II-A and Series III Land Rover—in addition to his NAS Defender 90, 2014 Range Rover Autobiography and electric Series I replica [see the article in the *Holiday 2013* issue —ed.] One Land Rover model eluded us, though, and that's the storied-in-lore Centre Steer prototype.

Maurice and Spencer Wilks with 1947 Centre Steer Prototype.

When Maurice and Spencer Wilks first envisioned the Land Rover, they understood that its primary applications would be related to the work of rebuilding and reviving war-torn Europe and their then-colonial empires. To reduce manufacturing costs and to mimic the practicality of the tractor, they entertained the idea of a centrally-placed steering wheel. Period photos prove that Rover manufactured some prototypes, but dropped the idea before production. That's the model that Jim wanted to recreate, and to accomplish that task, we undertook a trip to the UK this past spring.

We took the opportunity to stop in at Cox and Turner Engineering in Yeovil. Ian Cox, a recognized authority on early Land Rovers and a big help on the restoration of our Series I, proved as helpful and friendly in person as he had been in numerous emails over several months. He specializes in engine rebuilding, so he knew that the engine and gearbox for us would be the one used in the 1947 Rover 10. With the postwar introduction of the Rover 12, that engine and gearbox combination would also appear on those prototypes, but as we sought authenticity, we challenged him to find us a Rover 10 drivetrain. Ian assured us he could source one, and no matter what the condition of the engine, he could rebuild components as necessary to have it running for us.

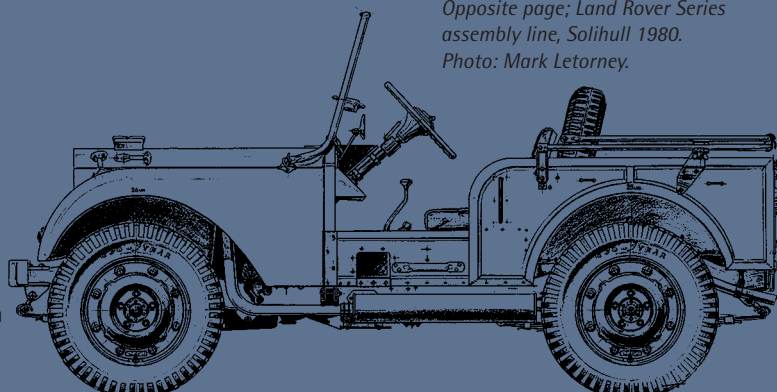

With Ian's guidance we turned our attention to the steering system and chassis. As befits its status as a prototype, the steering system seemed to consist of a timing chain and bunch of sprockets. It might be primitive, but we're determined to faithfully recreate it!

B&W Photos; 1947 Land Rover Centre Steer Prototype. Below colour; Centre Steer replica.

Opposite page; Land Rover Series assembly line, Solihull 1980. Photo: Mark Letorney.

It's well known that the impetus for the Land Rover came from the presence of wartime Jeeps in the UK. One resided at the Anglesey estate of Maurice Wilks, and his fear of how he would replace it prompted him to develop the Land Rover. The best evidence we could find suggested that a 1942 Jeep provided the chassis for Wilks' prototypes.

Several years ago, UK enthusiast Bill Hayfield recreated a prototype, which now resides at the Dunsfold Trust in Dunsfold. Philip Bashall created the trust which seeks to provide a home for every Land Rover model, including prototypes and one-offs, as well as become a living history source for Land Rover's heritage. Phil's knowledge base is substantial and he proved a treasure trove of information. We took numerous photos of the Hayfield recreation; he even put it up on a lift so we could photograph it from all directions. Fortuitously, Phil also had a 1942 Willys Jeep on hand, which allowed us to compare the vehicles and plan our own recreation.

Above L-R; Phil Bashall, Dunsfold Trust and Glen Parent, High Meadow Farm with the centre steer prototype replica. Left; Steering shaft gear system. Opposite page; Centre Steer Prototype at Dunsfold.

Cox and Turner have found an engine and gearbox for us and we're hot on the trail of a 1942 Willys Jeep. With the help of a local expert body shop, we're confident that this Holy Grail of Land Rover will become a reality. 

The New Age of Discovery

By Jeffrey Aronson

In recent years, Land Rover has used the New York International Auto Show as a launch pad for more than just its latest models. It's also raised the bar every year for manufacturer's presentations. Land Rover didn't fail to impress again during this year's New York International Auto Show Press Days in April.

When *Rovers Magazine* received its invitation to a "Launch Event" aboard the Intrepid Air and Space Museum—a decommissioned aircraft carrier moored at the Chelsea Piers in the Hudson River—we knew that Land Rover would be introducing the new Discovery V Concept. Gabi Whitfield, Land Rover's Global Public Relations Director, confirmed the return of the "Discovery" moniker for the US models (I'd never been a fan of the LR2/3/4 labels). What I didn't know was the rest of the story.

mobile device.

I had never been aboard an aircraft carrier, so the scale of the ship alone dazzled me. As you followed the eerily illuminated blue globes [think episodes of *"The Prisoner"*] that lined the entry path you entered through its lower decks. You walked past historic aircraft and a space capsule and then thanked the charming server

2014 New York International Autoshow

who just handed you a champagne flute [this is not a daily occurrence in this journalist's life —ed]. As you climbed the stairs to the upper deck, you stared at the lights of the Manhattan skyline as well as those from a splendid yacht, rumored to be that of a member of the Saudi royal family. With considerable multimedia fanfare—lights, sound, action!—a white cocoon rose up onto the flight deck via the plane elevator. Once pulled apart, it revealed the Discovery V Concept vehicle.

Our intrepid editor capturing the Discovery Vision Concept up front and center.

Gerry McGovern, Land Rover's Design chief, called this vehicle "A new vision for a new age of Discovery, for new customers and their new needs." Among them must be a need for speed, as McGovern also announced that 2015 would see the arrival of a Discovery Sport, "a mid-sized compact." Phil Popham, the CEO of Jaguar Land Rover, lauded "the new family of vehicles based on the Discovery, whose sales now exceed 1.1 million."

The Discovery Concept elicited a wide range of responses, from jaw-dropping to stomach-churning. Some features, such as the "suicide doors," will unlikely appear in production, but others, such as the built-in seat tracks to allow for easier interior configurations, could transform automobile manufacture. Gerry McGovern noted the "strong, passionate base" of Discovery enthusiasts and claimed that the concept "recognizes the past but is not harnessed to it." He hailed the "distinctive silhouette, step roof, rising beltline and floating C pillar" as examples of its connection to the Discovery I, which he stated, "clearly never went near a wind tunnel." The Discovery Concept retains the alpine windows, now fully

Dr Wolfgang Epple, Director of Research and Technology at Jaguar Land Rover discusses technologies of the future. Photos: Land Rover.

functional, and the asymmetric opening tailgate. It adds a “panoramic roof” whose surface can act like a window or a digital screen that can “augment reality” through projected images of more appealing vistas “with just a hand gesture.”

Celebrity designers like McGovern or Chris Bangle of BMW inject all their designs with their personal styling cues. McGovern’s time with Ford and Lincoln during Ford’s ownership of Land Rover clearly showed up in the current generation of Ford Explorers; this might explain why the rear of the Discovery Concept resembled a clone of the Explorer’s. McGovern stressed that this concept “will not be a replacement for the Discovery, but will influence future models within the Discovery family.”

As the champagne flowed and canapés disappeared, journalists had the chance to pass through a bouncer and a velvet rope to ogle the Discovery up close. If you’re a fan of the Range Rover Evoque—Land Rover’s fastest selling model in recent decades—you’ll love the styling cues on this Discovery. If you think the LR4 looks too bulky, you’ll also appreciate the taut exterior lines of this concept car, much as Range Rover enthusiasts have taken to the Range Rover Sport. If you expect a contemporary vehicle to cosset you, entertain you, provide you with constant interface through digital magic, you’ll find comfort in the interior and suspension features of this Discovery. If you think these issues to be piffle, you’ll be saddened by the emphasis on the ephemeral.

You expect new vehicle announcements at an auto show, but Land Rover launched another surprise as it introduced a new partnership with Virgin Galactic, the private space travel venture of Sir Richard Branson. His presence arrived in the form of a video screened on the superstructure of the Intrepid, through which he applauded the shared “spirit of adventure and exploration through technical innovation,” that linked Land Rover and Virgin Galactic. As spotlights illuminated another portion of the flight deck, a mockup of the Virgin

Galactic space ship came into view. George Whitesides, CEO of Virgin Galactic and Michael Masucci, Chief Test Pilot, introduced the partnership with screen shots of Land Rovers at Spaceport America, their New Mexico site.

Kim McCullough, Brand Vice President for Land Rover North America said, “We are very excited to be a part of Virgin Galactic’s vision for the next phase of travel and exploration.” She noted that, “Land Rover and Virgin Galactic are two great brands with a strong British heritage that embody a true spirit of adventure, underpinned by technical innovation. Both brands share a commitment to distinctive design and engineering excellence. They strive to push the boundaries of travel whether on land or in space.”

After the champagne haze, finger food aftertaste and visions of stunning models wore off, it was back to work the following day as Land Rover held an invitation-only Design and Technical Seminar. Dr. Wolfgang Epple, who leads JLR’s Research and Technology programs, introduced Gerry McGovern’s team: Richard Woodley [Special Projects], David Sattington [Interior Design Director], Massimo Frecella [Exterior Design] and Amy Frecella [Color and Materials Specialist]. All made themselves available for conversation after the three-hour seminar. Richard Woodley told me he has lived around Gaydon for 40 years and says he loves seeing “3–4 working Defenders drive by me every day.” He enjoys driving his Series II-A, named “Gordon,” and notes that British Series owners still wave to each other.

Gerry McGovern revealed that plans call for “three distinct families of vehicles, each of which will provide leadership in design and capability.” The Discovery family will emphasize “relevant versatility;” the Range Rover will emphasize “refinement.” And, lo and behold, the Defender family tree will emphasize “durability.” The three families will “recognize our past, but remain globally relevant in a modern context.” Land Rover believes it’s looking at an SUV global market of 20 million vehicles by 2020, and above all else, “we’re an SUV brand.”

In its 25 years as a model line, the Discovery has gone through four iterations: 1989–1998, 1998–2004, 2004–2009, and 2009–present. He acknowledged the “strong, passionate base” of Discovery owners, but stated that Land Rover must remain aware of “changing expectations, technology, environment and lifestyles.” In a nod to the pre-US importation of the Discovery, the Discovery V featured the removable bags in

Transparent
Bonnet.

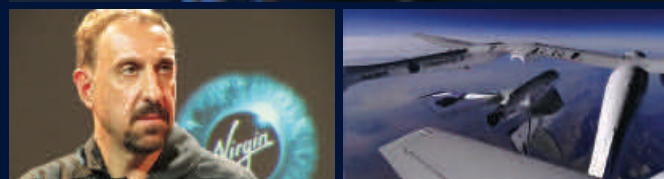

the door armrest—now designed to fit into overhead bins in airplanes.

Dr. Wolfgang Epple offered an overview of the challenges and opportunities for Land Rover. The company is perfectly entitled to claim leadership in the SUV segment, given its 66 years of experience with 4-wheel drive vehicles. However, the next 25 years will likely be the most challenging for the automotive industry as a whole. Demographically, the world continues to urbanize; it's estimated that 60% of the world's population will live in one of 40 megacities. This will place increased demands on environmental and safety issues, leading to "cleaner, greener vehicles." Expectations of how we interface with machinery through technology continue to evolve and Land Rover will have to remain cognizant of those trends. To keep abreast, Land Rover has invested in a National Automotive Innovation Campus at the University of Warwick [UK] and a Technology Research and Development Centre in Portland, OR, to enhance capabilities developed by Apple and Intel. Overall, Jaguar Land Rover will make a \$5.7 billion investment in these futures.

Enthusiasts of heritage Land Rovers might not care, but many current and potential enthusiasts expect dynamic, predictive capabilities present in entry-level smartphones to have made it into their vehicles; if a finger swipe can connect anything on your phone, why must you push buttons in your car? So at the seminar, and again at the formal press conference the following day, Land Rover presented a heads-up windshield display that lets you see terrain hidden from view, such as at the crest of hill or when fording a stream, through the use of wheel well cameras. It also introduced the concept that other functions, such as opening sunroofs, windows or doors, might be accomplished with hand movements. Or, since your smart phone app can activate digitally connected systems in your home, why not be able to ford a stream or pass through a gate while you walk beside your vehicle with your phone? As P.G. Wodehouse's Bertie Wooster would say, "the mind boggles."

In the midst of all the techno-talk, space flight and concept car presentations, perhaps the best news for enthusiasts came from Gabi Whitfield, who promised me that the next Defender will be "kick-ass rugged." And you can quote me on that!" //

A "Space Geek" Realizes His Dream

Mike "Sooch" Masucci graduated from the US Air Force Academy in 1981, with an astronautical engineering degree and became a full time pilot of F-16s and U2s, as well as a test pilot for new designs. After 22 years he became a civilian pilot of Citation 10s for XO Jet.

He also threw his resume out to the newly-created Virgin Galactic. "I loved flying those very fast [.92 Mach] and capable [47-50,000 ft. altitude] planes, but then Virgin Galactic called a couple of year ago and I couldn't resist. I was a space geek growing up, so this was always a dream of mine. I never had the chance for a NASA position."

Virgin Galactic grew out of the shared visions of aviation enthusiasts and entrepreneurs Burt Rutan and Richard Branson, in response to the challenge of the 2004 X Prize competition to incentivize the personal spaceflight industry. A decade later, "We're in the middle of the qualification testing through this summer, then we'll move from Mohave, CA, to Spaceport, NM. Richard Branson and his family will be the first flight in 2014."

In an interview Mike said, "It is rocket science, requiring really hard work to accomplish our goals: to build a repeatable level of safety in a space vehicle for commercial production. We're also helping the FAA with laying the groundwork for regulating this new industry."

"Our mission is suborbital space flights to hundreds and eventually thousands of people who want to see the world from a different perspective. There will be a desire to have more access, more companies involved, and someone will go into orbit. The future may include an orbital hotel, or micro-gravity manufacturing, or something I can't even imagine now. The excitement is precisely that I don't know the future. I'm doing something special and I feel privileged to be part of this. I don't know where it will go; the people and the market will dictate where this technology takes us." //

Pinch Me - Am I Dreaming?

By Rebekah Gleaves
Sanderlin

Perhaps we'd gone through a portal to a parallel universe.

My family and I headed to the first-ever Sand Rover Rally, a gathering for Land Rovers and vintage beach 4x4s in the northwest Florida panhandle area. One minute we were driving down Highway 98 between the perfectly pleasant, but somewhat predictable, towns of Destin and Panama City Beach, Florida—and the next we were in a place too perfect to believe.

Destin and Panama City Beach are the sorts of family and spring break vacation towns that boast water parks and outlet malls—where sunburned dads wear armpit-baring florescent green tank tops to dinner—where dinner usually means 'popcorn shrimp'—and where you can eat that popcorn shrimp while watching a menagerie of live alligators.

(That's Destin, in case you're curious. In Panama City Beach, the dinner entertainment is likely to be a wet t-shirt contest.)

But Route 30A is something different. It's like a Gulf Coast Palm Beach or a humid Nantucket, but with prettier beaches.

The community 30A gets its moniker from the state road that connects the 19-mile stretch of 12 extremely picturesque beach towns: Dune Allen, Gulf Place, Blue Mountain Beach, Grayton Beach, Watercolor, Seaside, Seagrove, WaterSound, Alys Beach, Seacrest, Rosemary Beach and Inlet Beach. (It is not, as my husband assumed when we first began seeing "30A" stickers on the cars of the locals, the name of a club for women who are extremely proud of having small breasts.)

I'd been told that 30A communities have year round populations with people who work at real jobs, but I can't find any proof of this. Outside of those in the hospitality industry, there doesn't seem to be much work taking place on 30A, or at least work as I know it.

What I do see are happy families in coordinated Lily Pulitzer outfits all but skipping past the retro-perfect Airstream trailers selling grilled goat cheese and prosciutto sandwiches, grass-fed-gluten-free hotdogs and single serving sized wine in to-go containers. (Wine—to go. Why has it taken thousands of years of human existence for someone to finally figure this out?)

People cheerfully walk well-behaved dogs, better dressed than me—and by that I mean the dogs. I see perfectly-imperfect communities, the kind of perfect that is so perfect that someone even

It's unclear whether craft brews attract Land Rover enthusiasts, or vice-versa, but two breweries popped a cap at Land Rover events this year.

Grayton Beer Company produced 30A Beach Blonde Ale to great applause at the Sand Rover Rally. Jamey Price founded the company four years ago and moved it to a new brewery this year. Right now, Grayton Beer is distributed only in the western Florida Panhandle, from Apalachicola to Pensacola, FL.

In a phone interview, Head Brewer "Shank" spoke proudly of his five creations. "30A Beach Blonde Ale, our newest, serves as our 'introductory brew,' the one that turns you on to craft beer. It has a nutty malt base with mild hops to reduce any bitterness. Our 'Grayton Original' represents my take on a German style beer—crisp and tangy. 'White Dunes' is for Belgian beer fans, using special yeast, dried orange peel and coriander—it's very refreshing. I'm really proud of our first brew, our Great Pale Ale. In honor of Colonel Gray, who serves as our founder, we have a bold American Ale called 1890 Founder's ale; it's an amber ale with a light copper color."

Sebago Brewing in Maine opened its doors in 1998, adding brewpubs in the Portland, ME area in addition to a line of craft beers. It launched its Bump Black Ale a short while before last February's Maine Winter Romp and happily shared samples at the event. What instantly attracted Land Rover enthusiasts was the Series Land Rover on the label and carton!

Jesse Baines, Sebago's Brand Ambassador, said that Brewmaster Tom Abercrombie, his brother and buddies, "spent many springs enjoying mud season in Maine in the very Land Rover pictured on the BUMP Black Ale label." As most Mainers do, Tom sees spring as a bump in the road to summer; 'Hey, we might as well enjoy the ride.'

The brewery features seven craft brews on a regular basis, but also features seasonal beers, such as this summer's Simmer Down ale. Jesse Baines described BUMP Black Ale as, "bright in body yet dark in color, BUMP may look like your traditional black ale, but is surprisingly clean and dry with a very subtle aroma of chocolate and coffee malt—the perfect beer for early spring." There are also five single batch and specialty beers currently available throughout all of New England. 

Photo: 30A.com

Craft Brews for Land Rover Enthusiasts

1988 Defender 110 ex-Camel Trophy Work Shop Unit.

went to the trouble of making sure that they don't look too perfect. All set against a fringe of clear emerald green water and sand the color and texture of powdered sugar.

And occasionally, I see Truman, a 1986 Defender 90 owned by Mike Ragsdale, one of 30A's most exuberant ambassadors and our host for the weekend. Truman has become the mascot of 30A; he got his name from the 1998 Jim Carrey movie, *The Truman Show*, filmed in the 30A community of Seaside. (The premise of that movie, incidentally, was that Jim Carrey lived in a town that was too perfect to be real.)

So there we were, obviously now on the other side of the portal, driving my husband's recently acquired dream vehicle, a beautifully restored 1985 Land Rover 110, to one of America's most picturesque

communities, to go off-roading and meet other Land Rover enthusiasts for a weekend-long party. What could go wrong?

This is the point in the story where I should tell you about all the things that went wrong but, honestly, that just didn't happen. We got there and our children behaved. They frolicked—frolicked!—in the grass with the other Land Rover kids. None of them fought, doused another with Kool-Aid, bit, pulled hair or kicked. No one was injured and there weren't even strange smells coming from the row behind us—all things we've never been able to say after a Sunday spent in church. Nothing. The 30A spell was Just. That. Strong.

Mike Hall of Haleburg, AL, turned everyone's head when he pulled up in a white Defender with a paddleboard on the roof rack and loads of fishing gear. And Joshua Todd, from Mobile, AL, was there

Pinch Me - Am I Dreaming?

By Rebekah Gleaves Sanderlin

Alex Aldworth and his new 1995 Defender 90 NAS.

Happy Children!

with his adorable 4-year-old daughter Jaden and his 2003 Discovery. Joshua said he had recently given his Disco, which has more than 200,000 miles on it, a "heart transplant", outfitting it with a "new" (meaning, rescued from an old Range Rover) engine.

Russell Thompson, of Panama City Beach, made everyone stare when he rolled up in his 1988 Defender, but he had probably expected that. The bright yellow, one-time Camel Trophy support vehicle wasn't likely to go ignored. Russell imported it from England and it arrived just two days before the Sand Rover Rally, absolutely pristine, with just 33,000 original miles on it.

Alex Aldworth was also there showing off his new Rover—a 1995 Defender with just 59,000 original miles. Alex, who lives in Atlanta, had owned it for just six weeks before the Rally, having bought it sight

unseen from its previous owner in Chicago.

"I've always wanted a Defender, since I was 15 or so," Alex said. "I found this one online and bought a one-way ticket just hoping it would work out."

In addition to hanging out around the Green at Gulf Place while admiring each other's Defenders, Discoverys, Series Rovers and Range Rover Classics, and riding the trails at Point Washington State Park, attendees enjoyed cocktails at Messina's restaurant, Sunday brunch and live music at the funky Red Bar, a day soaking in the mild temperatures and abundant sun on the phenomenal Grayton Beach, and the weekend was capped off with a sunset outdoor bluegrass concert by a band called... wait for it... Old Truck Revival.

It just doesn't get more perfect than that. 

[Sarah Hamilton, Milton, FL, grew up on the breathtaking Kenai Peninsula of her home state, Alaska. When she's not herding hens and Mumford, her "naughty rooster," she's camping and fishing in her 02' Discovery II. Sarah lives with her family while attending Pensacola State College —ed.]

This time last year the cold in Alaska turned my toes blue; now my scalp burns under the hot Florida sun. I missed my Land

Rover adventures in the frozen north, but on this sunny Saturday, my brother Andrew and I would make our way to our first Land Rover event in our new home state.

If I'm new to Florida, so, too, is the "30A Sand Rover Rally", organized by enthusiast Mike Ragsdale. It was a sunny Saturday on the Florida Panhandle as my brother Andrew and I made our way to Santa Rosa Beach, FL, for the event, which promotes the beaches and towns along this historic state road. Sunscreen in hand, (a must for we fair skinned, overcast-loving, gingers of the north), we rode the stunning Emerald Coast, eagerly anticipating a day with Land Rovers.

As we pulled into the village green at Santa Rosa Beach, we took in the sight of the 40 Land Rovers in attendance; most sparkled from a fresh wash and I immediately thought I should have taken more care of my own Land Rover's appearance. Hey, a girl can fret about such things! Needless to say, I was a little embarrassed with the state of my own cross-country expedition Discovery.

After meandering around, we spotted 30A.com's official mascot, "Truman the Defender" and made our way over to Mike Ragsdale.

Beach tunes blasted from an old suitcase made into speakers (freaking awesome!) and Grayton Beer passed out bottles of its newest brew, "30A Blonde Ale", in honor of the event.

I asked Mike what in the world made him choose a Land Rover Defender. As any enthusiast knows, regular people don't just opt to have an older model of any Land Rover as their daily driver. Those gems are reserved for unique, wild at heart, adventure-loving individuals. Being new to the southern beach culture, his response intrigued me. Mike said, "Around here, owning BMWs and Porsches isn't part of the culture. It's all about the funky old beach cruisers that are missing parts, blowing smoke and barely running." Truman, who looks and runs better than that, fits perfectly into that ethos. So, he decided to create an event that celebrated "Sand Rovers" of all makes and models, complete with sugar white sand covering their floorboards, and the gorgeous stretch of beaches that line the coast.

The "30A Sand Rover Rally" featured a variety of non-Land Rovers, including classic Ford Broncos, International Scouts and (yawn!) Jeeps, but my attention focused on the gorgeous Land Rovers.

Go South Young Woman

By Sarah Hamilton

The majority of Land Rover lovers came from Georgia and Alabama, including Steve and Cindy Ogletree, who own and run Adventure Motor Cars of Birmingham, AL. Their breathtaking Defenders were not hard to spot from across The Green. In fact, we were so excited to go ogle their custom Defenders that we may or may not have raced over to their neck of the lawn.

Stephen Ogletree said that a Land Rover had been his dream car since childhood. It all started with a RHD 1972 Series III named “Charlotte” that he bought in 2000, when he graduated from Auburn University. When Steve and Cindy decided to start a family, they reluctantly sold the Series III and used some of the profit to purchase a ‘94 NAS Defender. Cue the light bulb moment—Stephen had found a way to take his passion and make it his everyday job. With the support of his extended family, he started Adventure Motor Cars.

They specialize in ‘94, ‘95 and ‘97 NAS Defenders and can give their clients their heart’s desire, from fully-stock restorations to considerable upgrades. “We worked nights and weekends from 2001-2004 in creating the business,” Stephen said, “growing from

sales of 14 cars in our first year to over 60 in 2008. Since 2011, we’ve moved into refurbishing and customizing Defenders, as the majority of our clients are stepping out of newer Land Rovers and other high-end vehicles and are requesting the creature comforts and conveniences that come in modern vehicles.” Adventure Motor Cars refurbished 18 Defenders and sold over 40 more last year. “I’m constantly driving or flying around the country to look at Defenders,” Stephen noted. The Defenders that came to the Sand Rally included an example of a ‘94, ‘95 and ‘97 model.

30A.com's official mascot, "Truman the Defender" enjoying the event.

Be still my beating heart—seriously, there were so many Defenders in one place! With a smile plastered to my face I walked up to speak with the owner of an '87 Defender 110. This gentleman works as a professional photographer who travels all over the world shooting exotic sports cars such as Lamborghinis and Ferraris. I asked him, "Why a Defender?" He smiled and said, "I have been all around the world shooting every dream car imaginable, but the Defender is where it's at."

He uses his Defender as his daily driver to photo shoots and packs his Defender to the brim with all his photography equipment and essentials that the models will need. He customized his Defender with curtains on the inside to make a make-shift changing room for the models. He also added solar panels on the top so he is able to charge every piece of equipment he brings with him. No only does he use his Defender as his unique work truck, he also uses it to be able to get better angles on whatever the dream car of the day is. I do say, I think the Queen would be proud.

Towards the evening we spied a group of Discoverys rolling onto the grass, slathered in red mud, looking absolutely filthy next to the freshly washed and waxed beach cruisers. Two men got out of their truck and, with a bungee cord, attached a Land Rover flag between two of the Discoverys. We had evidence they took trails

just to get to the event. Yup, this group is proper! We learned that this fine convoy, led by Charles Bell Jr.'s group, represented the Gulf Coast Land Rover Club based out of Mobile, AL. We found ourselves greeted by smiling faces and the latest country music blasting.

Charles and Joshua Todd joked about how they off-road on their lunch breaks and swing by Taco Bell on the way back. As we're still new to the Gulf Coast area, they provided lots of Land Rover knowledge and tips for us; if you're like me, a Land Rover lover

Go South Young Woman

By Sarah Hamilton

Gulf Coast Land Rover Club arrives in style, with mud and branches...

who has a lot of experience getting stuck—these are the guys you want to go with! In fact, on the way down from Mobile, AL, one of their members had a mechanical issue; while everyone went to Waffle House, Charles drove back to Joe Bullard Land Rover to get the parts needed to get it back on the road. Like I said, if something goes wrong, you want to travel with this group!

As the event came to a close, Angela Ragsdale and I discussed

sunscreen, yoga and the beautiful beaches on this stretch of the scenic 30A highway. Thus, Rosemary Beach entered my list of places to Rover Trip to this summer. I'll take what I can get! My Discovery and I are definitely taking this break from the Far North in stride. For now, there are beaches to explore and my Rover will join the "sandy floorboard club" while we soak up the beauty that is the Emerald Coast. //

Letters to the Editor

Dear Rovers North,

This is what a foot high stack of Rovers North invoices and 250 hours of shop time can accomplish; here's our 1970 Series II-A, which had sat in a barn for 30 years. My son Ebben and a friend captured this sunset on Hardluck Hill—priceless!

Jay Whitehair
Norwich, VT

[So is the terrific refurbishment of your Series II-A —ed]

Dear Rovers North,

Mark Letorney probably remembers installing a rebuilt starter for me in Waitsfield [VT]—while on his back in a foot of February snow in 1978! Mark told Joanna and me that day about his dream of starting a Land Rover parts company. Congratulations and thanks again for all you've done for Land Rover enthusiasts everywhere!

Daniel and Joanna Cote
Double Gun Journal
E. Jordan, MI

[Wait a minute! Mark installed a starter in the dead of winter? How come he made me install my own? —ed]

Ebben and 1970 Series II-A

Dear Rovers North,

We were invited to be part of an area dealer's off-road event and had a pretty ride with other Land Rovers in Hamilton, MA. This area is horse and polo country, another world to me. My daughter and I were happy to be one of the older Rovers.

Cynthia Wojcicki
Hampton, NH

Above: Kiley, Katie, Baxter, Guinness, Dakota, Nala, Bruna, Oreo, Tinkerbelle, Jingles and Stripes

Dear Rovers North,

Thank you for all your help in ordering parts to convert our hardtop to a soft top, making our '73 a dream. The girls love us to take them in it for ice cream every summer.

Everyone in the clan loves the Rover. The dogs have had many enjoyable outings. The adopted goats rode home in the back. Stripes, our Bantam chicken, uses the hard top as a shelter. Our Rover is used like it was meant to be used... working! It makes picking up hay, plants, as well as groceries a breeze!

Regards,

Kristie Gonsalves, Keith Bedard and Kiley, Katie, Baxter, Guinness, Dakota, Nala, Bruna, Oreo, Tinkerbelle, Jingles and Stripes
Canton, CT

[We commend every member of every species getting along so well in the Land Rover —ed]

Dear Rovers North,

I still love doing business with you folks and will continue. Maybe not forever, but for as long as I have my Series III—and that's the story I want to share.

On a cold February Sunday two years ago I searched eBay Auctions for Land Rovers. I found a terrific looking truck in Jasper, TX, pretty far away and heck, I had no room in my garage because of the Harleys and Porsches. I ignored the impulse for five minutes, put up for sale a 1962 Porsche 356 B that went fast, and then called the Land Rover's owner.

Wayne Hanson had purchased the truck years before and his good friend, sadly deceased, had completed a restoration. We chatted and swapped photos for a few days, arrived at a price, and arranged for transport back to Vermont. It was better than described, much more so than he told me—it was wonderful.

Looking over all of the receipts and invoices I noticed that there

Series III from Texas.

was a large amount of receipts from Rover North. It's interesting that tons of parts from Rovers North went down to Jasper Texas, and now I've bought the truck and returned it to Vermont. Funny how things work.

Lee Garsh
Barnard, VT

[It's a stunning Land Rover, Lee. Do make the drive to Rovers North so we can see it in person —ed]

Behind the Steering Wheel

Story and photos by
Jeffrey Aronson

Dueling weed whackers, Joanna Fosque [L] and Jeff Aronson [R].

“**T**here ain’t no cure for the summertime blues,” sang Eddie Cochran decades ago. Actually, there is—and if you’re a reader of *Rovers Magazine*, you already own it or want to find one. It’s your Land Rover.

Inside your Land Rover, the mundane chores of daily life, from commuting to work to ferrying your kids and all their friends to summer activities, become far more entertaining. That Green Oval spirit imbeds itself in every vehicle that has left Solihull, an element of the soul of every Land Rover. I’m reminded of a Land Rover France advertisement for the Discovery. As a mum drives along a mountain road her children call out, “Turn right!” and “Turn left!” every time they see a stream, rocky trail or forest glade. French kids would not do that in a Peugeot or a Renault. Your kids would not do that in a minivan; they’d be texting friends to meet them at the mall.

In a Discovery, Defender or Series Land Rover, everyone calls out for the jump seat or bench because sitting there feels wicked fun. Your Range Rover commands the road with its style—especially in your Range Rover Classic—and panache. It’s ready to tackle any obstacle, from a traffic jam on the interstate to an off-road trail. When time permits, you can pack your Land Rover with any gear necessary for a weekend jaunt or vacation adventure. With the dozens of off-road events from coast to coast, thousands of public and private parks, 50 states and thousands of cities and small towns to visit, you have no shortage of opportunities for summertime fun.

Land Rover expects that you actually want to drive and engineers

and designs the vehicle accordingly. Google believes otherwise and has spent millions on a self-driving car. In an intriguing essay, Delia Ephron lambasted the idea, “In one fell swoop [Google] struck a blow at masculinity, female empowerment, romance, sex and action heroes. It may even violate two of our three inalienable rights—liberty and the pursuit of happiness.”

Ephron writes, “On my 16th birthday, I got my license. Hello, freedom... with Google cars, there is nothing to learn, nothing to master. This car fosters passivity, nurtures infancy. It has no driver, only passengers.”

Land Rover
Advertising
1995 Discovery
Les Bras France.

“Over the years, I have grown to feel that the greatest thing about driving is that, if I really need to get somewhere or really need to get away from somewhere, I can do it. Essential to that sense of security and power is that I am actually doing the driving. Now I imagine running out, jumping into the car, and having to call tech support.”

“Suppose Thelma and Louise were on the run in the Google car. Louise is not behind the wheel. There is no wheel. No Thunderbird. No top down. Imagine James Bond in a Google car. No, don’t imagine any of this, it’s too depressing.”

She’s right, which is also why I’m unexcited about Land Rover’s vision of controlling your Range Rover through your tablet or smartphone. Let’s say you’re greenlaning and come across a gate and step

out of the Range Rover. As touted at the New York Auto Show Design and Technical Seminar, an app might enable you control the vehicle remotely by having it move forward as you close the gate. Really? Football Wives, anyone?

Summertime fun with Martha Belshaw, Robby Tolette [L-R standing]; Megan Archino, Spencer McDonough, Anna Tolette, Alexis [L-R seated].

Of course, you don't have to drive a Land Rover for them to entertain you—being a passenger is sometimes more than enough. This July my Land Rover provided the perfect summer entertainment for friends from Connecticut who piled in when offered a ride to an island quarry.

Soaking wet bathing suits from a boat ride in choppy seas certainly didn't bother the elephant hide seats. The rubber mats could care less about the sand, dirt and salt water encrusted feet. The three-abreast front seating and four rear jump seats backed up Land Rover's claim of the Deluxe Station Wagon's 7-person capacity. Admittedly, it helped that they were all friends in advance, as things got a bit intimate with the Rover full up.

The QE I served again as part of a parade float in the July 4th celebration. Last year it pulled a giant duck and a bunch of kids down our main street. This year it towed my *a capella* group, for which I had to recruit "fans" who would look happy as we sang along the parade route. Naturally, a ride in the Land Rover in front of hundreds of spectators made the whole thing an easier sell than listening to me warble. Without question, however, the far-greater task was to allow someone else to take the helm of the Land Rover. How do you explain a slightly leaky clutch, double-clutching, steering while in low range and eyeballing the temperature gauge in the 5 minutes before the parade departure?

Riding the parade float: Sara Peck, Josie and Laura Dooley [L-R front], Christie Lynch Michaud and McRae [L-R rear].

This time of year, when I'm not on a laptop editing *Rovers Magazine*, I'm mowing lawns and caretaking properties. I face three impediments in competing for co-workers. One involves income; a job as a "stern person" aboard a lobster boat would be far more lucrative. The second involves entertainment; who wouldn't want to be on the water every day hauling in crustaceans? The third is, well, me; who would actually want to labor with me daily?

Fortunately, the QE I, my '66 Series II-A, became my ace in the hole. Long-time summer residents Joanna Fosque, Watertown, MA, and Taylor Emhart, Yardley, PA, found themselves as recent college graduates in need of summer income. Lobster fishing would not work for their multiple obligations—would I have any need of co-workers this summer? I would, indeed, and we would be riding around in the QE I all day, everyday. "That's perfect!" said Taylor. "I've never ridden in the Land Rover; let's do it," insisted Joanna.

The first day each took a turn in the rear jump seats, practicing their royal waves on island friends as we traveled from job to job. When they tired of their newfound fame they reverted to piling into the front seats, proving that Land Rover did not exaggerate when it claimed an 88" Station Wagon offered "seating for three up front." Of course, it can also fill up with all kinds of work gear and tow a heavy trailer without hesitation. Whether driving topless, or shaded by the rolled up canvas top, a Series Land Rover elicits

grins from island neighbors and astonished looks from day-trip tourists. No matter how physically fatigued, neither Taylor nor Joanna fail to smile the moment we jump into the Land Rover.

Summertime blues? Not in your Land Rover! 

"But first, Let me take a selfie." [L-R] Joanna, Taylor and Jeff.

Lawnbusters Joanna Fosque, Watertown, MA and Taylor Emhart, Yardley, PA [L-R].

[What to do when you want to off-road as a group in unfamiliar territory? Call on Bill Burke as your leader/instructor. That's what a group from Texas Rovers did in April 2014, when they wanted to off-road in Utah. We thought it would be interesting to share the observations of Christopher Pullen, Colleyville, TX, the president of Texas Rover and an ex-pat from Cosham, Portsmouth, England —ed.]

Laura Shacklette, Bill Burke

Burke's Corner

Photos: Sarah & Mark Caldwell, Laura Shacklette, Jay and Connie Azores

A Monday morning found us gathered at our meeting point at the Visitors Center in Blanding, UT. We had traveled there over the weekend in three convoys. The “we” also included Mark and Sarah Caldwell, Arto and Wendy Pullinen, Darrell Oliver and Laura Shacklette, Nolan and Susan Pazin, Jay and Connie Azores, Robert Fleming and Mike Neal. Apart from Nolan having to change a brake line that morning, Rover-wise all was well.

What wasn't well was Bill's absence; whilst I tried to remain outwardly calm, inside I was dying a thousand deaths as these people had trusted me with their money and had driven hundreds of miles. My gloom quickly disappeared when Bill roared into the car park apologizing for his late arrival due to bureaucracy in the local BLM permit office. We quickly drove out of town and parked up to air down and have our first drivers meeting. Bill explained the conditions we should expect: warm days, cold nights, and the need for hydration daily, sunscreen and lip balm.

Pointing far into the distance at two lumps on the horizon, he told us that we would drive over one and through the other. Exciting stuff, I thought. Setting off, we convoyed through the dust upward and upward and on reaching to summit, we descended down a switchback, which at the time I thought quite hairy—little did I know what lay in the days ahead.

We stopped midway down and Bill pointed out two vehicles that had not done so well—one perched halfway down the mountain and the other, on the bottom, several hundred feet below. We also took time to look at several carved figures and signs in the rock face.

We stopped for lunch along Posey's Trail at a spectacular overlook; whilst we ate, Darrell changed out his leaking coolant expansion tank. After lunch we enjoyed ever-changing scenery through Arch Canyon, and on our way to camp we found that a very large section of the track ahead of us had been washed away. We discussed whether we would slip into Camel Trophy mode and build a way across, or keep to our packed schedule. We took a quick bypass on pavement, rejoined the trail, and finally stopped to camp for our first night in

Mule Canyon off Dog Tanks Road. After setting up tents, we built a big fire and had our first campfire singsong.

I have spent time in the desert before and expected warm days and cool nights—but here, when the sun went down, it became bloody cold. I don't think anybody, apart from Bill, stayed warm that night.

Breaking camp, we set off for more adventure. Day two took us to Mule Canyon and to a local Pueblo, with a kiva still in excellent condition, then on to some amazing cliff dwellings at Cave Canyon that required a hike and a half, down nearly into the valley floor to explore. The more adventurous climbed further down to the “honey-moon suite”, set in the rock face several hundred feet lower down, and were rewarded with some incredible views and the chance to see shards of pottery still laying around. On the way back to our trucks we passed the lone grave of a cowboy buried out there in the wilderness.

After seeing the Solstice Center, we took Pine Spring Road to Salvation Knoll. The knoll got its name when a Mormon named George Hobbs, part of a party scouting a possible wagon route, got lost, and by climbing the knoll got his bearing and thus could lead his party to safety. Hiking up to the top of the knoll, we were again rewarded with incredible views of the Blue Mountains, and that night we camped near Dripping Springs Road, part of the old Mormon Emigrant trail. After dinner we sat around the campfire with our adult beverages of choice.

In the morning, we dealt with a search for Darrell's keys and once again plugged one of Robert's tires, wounded in a fight with a rock the previous day. Bill led us on a winding, dusty trail that changed to rock, and as the altitude increased, changed again into snow. This trail was to take us through the pass through a formation named Bears Ears, where we were forced to stop several times to remove fallen aspens that blocked the trail. Out came the handsaw, and after cutting the first one into sections, Bill dragged the trunk off the trail. After that, we simply used brute force and ignorance on the rest of the fallen trees.

The higher we drove the deeper the snow; at one point Jay got high centered and needed Sarah to pull him

backwards out of the white stuff. The trail took us ever upward and we drove past Dark Canyon (suitably named) and Big Notch. That night we camped among the pines and snow. Before dinner, Mark replaced a headlight bulb and then

cleaned everybody's windshield. After dinner the younger crowd, namely those who could still breathe and run at this altitude, played a game of softball while us oldies sat round the blazing campfire, enjoying Bill's observations and entertaining personality.

The next day we broke camp and drove towards Beef Basin, stopping en route at another overlook with magnificent views. Further down the trail we stopped at a formation aptly named the Flame. Alas, the temptation was too much for the Fun Zone, and off they set to climb it, while the rest of us set off, since the trail was pretty straight ahead of us. Entering Beef Basin, we stopped at the ruins of an old Tower, and then further on we stopped at the site of an old Indian farm. Leaving the farm, our convoy attracted the attention of local cattle grazing nearby—Arto's red Discovery and Sarah's orange G4 appeared to get special interest from a rather feisty young heifer.

The trail then led us towards SOB Hill and adventure time. This part of the trail has been written about in several magazines for its difficulty. It appeared that it was going to be somewhat more difficult today since

parts of the trail had been washed out. Slipping into our Camel Trophy mode, we set about building parts of the missing trail. With spotting help from Bill, Arto, Darrell and Mark, after some time the convoy gingerly picked its way down the trail to the road far below. That night, we camped for the last time in a rock walled corral named Bobby's Hole.

For our last day with Bill we set off heading through the Needles District with breathtaking rock formations on either side of us towards Chessler Park. The trail took us towards another

climb through the rocks, the last part being so narrow we had to reverse to make the final turn to climb out. All went well until Laura, driving Darrell's Range Rover Classic, started the climb. An apparent miscommunication between driver and passenger meant the Rover did not follow Bill's direction, resulting in a snapped rear axle. Bill once again came to the rescue and guided the Rover down the hill, where an hour later, the axle was swapped out with a donated one from the Caldwell's.

We set off again, slowly descending with a lot of rear ends banging down Silver Stairs towards our last lunch stop at Confluence, where the Colorado and Green Rivers meet. Another brisk hike up to the viewing spot gave us a wonderful view of the two rivers. After lunch we set off for Elephant Hill. Climbing up this switchback required us to reverse when we were halfway up, so that we could make a very sharp turn and continue. Everybody made it up without drama and then we got to do the same maneuver on the way down.

Leaving the Hill and heading towards Newspaper Rock, our goodbye hugs and tears spot, we stopped off to air up and change our air filters. Off-roading with Bill Burke provided us all with the hands-on, scenario-based, real time training that enhanced our off-road skills. Darrell Oliver would later say that, "Bill made it clear that he was the trail leader and that we had asked him for his expertise and knowledge.

Following his instructions taught me a lot—and that he's a very intelligent, very interesting guy!"

Things I learned:

1. America is one hell of a beautiful country.
2. A Trasharoo is a very important off-road accessory.
3. Good friends are precious.
4. I need to improve my left foot braking technique.
5. I'm doing another trip with Bill next year. //

Chassis – DEFENDER

Introducing our new selection of Defender galvanized chassis, packed with all the improved features found on the latest Defender. Built on factory jigs for accuracy and hot dipped galvanized for long corrosion resistant life. Now is the time to build your ultimate Defender.

Highest quality chassis at the best prices

- Adjustable rear body mounting bracket on chassis ordered with Puma rear cross member.
- Galvanized gearbox cross member to match your engine type (V8, 200Tdi/NA, 300Tdi).
- Updated rear top link bushings.
- Pre-positioned wire snake for easy main harness installation.

Defender 110 V8 Galvanized Chassis shown RNH710

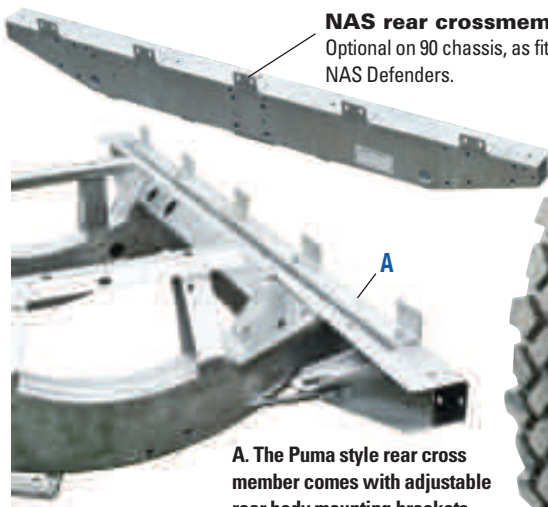

Puma rear cross member features

- A. Adjustable body mounting bracket.
- B. Integral fixing nuts for tow plate - for easy mounting.
- C. Recessed mounting for towing plug - for better protection.
- D. Bottom mounting blocks for rear NAS step.

NAS rear crossmember

Optional on 90 chassis, as fitted to NAS Defenders.

A. The Puma style rear cross member comes with adjustable rear body mounting brackets.

All our chassis are shipped via truck freight and are built to travel. You will be contacted with actual freight charges prior to shipping.

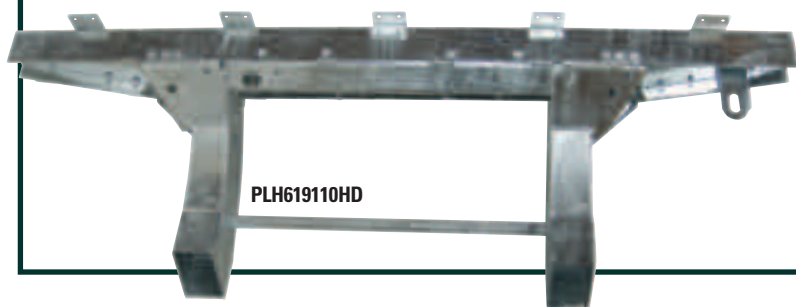

Defender 110 Rear Cross Member

Replacement Rear Cross Member Defender 110 with 15" Extensions

Made with 3 mm thick steel for extra strength. Hot dipped galvanized for superior corrosion resistance. Supplied with 20" extensions for faster installation. Made in the UK. Fits: Defender 110 all models 1983 - 1998.

Rear Cross Member, Defender 110.....PLH619110HD \$ 498.00

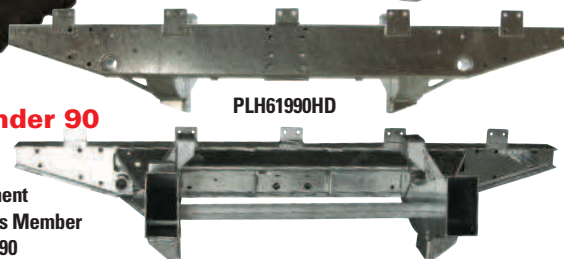

Defender 90

PLH61990HD

Replacement Rear Cross Member Defender 90

Don't just repair your chassis, improve it. Made with 3 mm thick steel for extra strength. Hot dipped galvanized for superior corrosion resistance. Supplied with 20" extensions for faster installation. Made in the UK. Fits: Defender 90 all models Except NAS 1984 - 1998.

Rear Cross Member, Defender 90.....PLH61990HD \$ 489.00

FRONT RUNNER
VEHICLE OUTFITTERS

Dear Rovers North,

I always enjoy your magazine and thought you'd get a kick out of this. I drive a 1995 Defender 90 and I'm a member of an elite Air Ops group called RAVEN (Regional Aviation Enterprises), working under the Department of Emergency Management. We were part first on the scene of the Oso mudslide disaster in Washington. I thought you would like to see a Rover in action.

Ed Ward
Kirkland, WA

[Thank you for your service at times of crisis —ed]

Dear Rovers North,

I spoke with the owner of this Discovery, hard at work along the interstate. He said it's his daily driver and he can run through the mud all day and then drive home at 80 mph!

Troy Phillips
Indianola, IA

[Now there's a working Discovery! —ed]

Dear Rovers North,

Please welcome my daughter Emily to the Land Rover enthusiast family. She just got her license and I thought, what better first car than my 2004 Discovery that, with the help of Rovers North, has been fitted out quite nicely. She is enjoying every minute behind the wheel. Next step—teaching her the joys of off-road driving. Thanks again Rovers North.

Bill Mariano
Manchester, VT

[We know how much you hate to part with any of your Land Rovers. Good thing Emily came of age in time —ed]

Product Information

Standard Front Seats in Black Vinyl

Exmoor Trim produce a range of Series II-III seating that is simply as good as it gets.

The front seat cushions and squabs use modern high quality foam, have superb feel and ride. Fitted with the metal back plates beautifully reproduced as original and not with a substandard wooden frame—an important safety factor. The Standard, Elephant Hide and Deluxe seat backs are supplied with new pivot bolts, nylon washers and locking bolts, if you require leather retaining straps then these are available separately. Seat belts not included.

Product Information

Extreme Hi-Back Front Seat Assembly

Designed for comfort and improved support for your Series Land Rover. The seat back has twice the height of a standard seat back with integral head rest, rear pocket and internal steel frames for strength and durability. Sculptured back and raised base sides hold you in place on or off-road making those longer journeys easier.

Supplied with new pivot bolts, nylon washers, locking bolts and leather retaining straps.

Product Information

Standard Front Seats in Elephant Hide Grey Vinyl

seating was introduced into mainstream Land Rover production in 1954, and used to great effect in the Series II and IIA interiors.

At the time there were on average 1700 Land Rovers rolling off the production line a week. Taking in to account model variations and seating types, the result was over 1000 seats a day going through the exceptionally busy trim shop. We now have a material that's a superb reproduction and gives all of the features that are so important if restoring these historic vehicles. Now manufactured with modern quality vinyls that give the same effect and long life as this classic material has done for over 40 years. Seat belts not included.

Deluxe Front Seats in Black Vinyl

This style of deluxe front seats was used throughout the production run of the Series III Land Rover with its distinctive sculptured design and face fluting running from front to back in the centre panels of the seats. The centre seat back mounts with pin type fittings and the outer seat backs mount with fixing bolts that use internal threads for securing upright into adjustable trays.

Series II, IIA, III Canvas Tops

The Premium top from Exmoor Trim is specifically manufactured for the vehicle restorer. We are fortunate enough to have all the original drawings from Land Rover for these tops and the knowledge of the original manufacturing methods and materials of which we have gone through exactly to produce this top.

Great care has been taken in selecting the correct materials and detail where it matters most by using the original 3 strand twisted ropes, vinyl fuel splash patch and pre shrunk windows tape sealed in the original way and many more fine details, but most importantly of all the fitting is exact and once the top has settled down they look great.

Our skilled staff understand exactly what is required and ensure that all our Tops are made with care and attention to detail. Deep Weave Canvas is the new benchmark set by Exmoor Trim when using a 100% natural Cotton fiber. By using modern manufacturing techniques and water proofing we have reproduced the original color, greatly reduced shrinkage and retained all the crucial features that all our customers have come to expect from an Exmoor Trim Top. See page 64 for more tops.

Product Information

The Modular seat from Exmoor Trim provides superior comfort and support. Offering raised sides to the seat bottom and back rest with high density foam to give a snug fitting seat with improved lumbar and rear pocket as standard. The seat base can still be removed allowing easy access to your battery. As with all Exmoor Trim seats, options are available for pneumatic lumbar supports and seat heaters.

A good all round seat ideal for on or off-road use. Approved by Vehicle Certification Agency (VCA). Mark 1 Impact Tested (Millbrook Testing Ground). Approved worldwide and certification supplied with every seat. **Sold in pairs.**

Add Factory Installed Heat or Lumbar support to any seat, see below.

Fixed Seat Risers

This new Exmoor Trim seat riser and rail protector with the Range Rover grill incorporated into the design to give them an up to date and stylish product finish. They are now available as either left hand or right hand and are simply installed beneath your existing seat runners to give extra space between steering wheel and seat back, ideal for taller drivers.

Quick and easy to install with 3 positions to bolt your seat to, each position giving increased leg room to the driver or passenger with exceptional seating posture and seat travel. The raised outer side gives extra protection to the seat runner from damage. The riser is made from 2.5mm steel for maximum strength with a black graphite finish. Comes complete with fittings and instructions. Sold per seat.

Product Information

The Defender Elite Seat

is our most popular front seat for all Series or Defender models. The Defender Elite seat has unsurpassed comfort, support, style and hold. Raised bolsters in the seat bottom and back give excellent longitudinal hold. A higher back also adds to superior comfort and support with advanced lumbar support. Reclines with adjustable twin stalk headrest and removable seat base for battery/storage access. Rear pocket as standard. As with all Exmoor Trim seats, options are available for pneumatic lumbar supports and seat heaters. A good all round seat ideal for on or off-road use. Our constant focus on quality with all our products ensures you get the best. Approved by Vehicle Certification Agency (VCA). Mark 1 Impact Tested (Millbrook Testing Ground). Approved worldwide and certification supplied with every seat.

Sold in pairs.

Defender Front Seat Retrim Kits

Product Information

Exmoor Trim offers the Defender front seat kit as an alternative to replacing your entire front seat. This kit has been assembled with the vehicle restorer foremost in mind, allowing the individual to replace all the important external and internal small components that make all the difference to the finished job.

These kits only use OEM Denim and OEM vinyl sides and rear materials. The Premium Retrim kits include all new foams and seat & headrest covers, new replacement mechanism covers, adjuster knob, internal diaphragm, base pan plastic mountings, headrest finisher plates, headrest internal roll pins, spray adhesive and hardware. So you are guaranteed to be able to strip your seats down, restore all the metal work in the knowledge that all the seat components you need to finish your seat restoration are to hand.

Defender Moulded Matting System

The Black Molded Matting System from Exmoor Trim has been specifically designed to increase ride comfort by greatly reducing heat and road noise.

The 3 piece matting system is manufactured entirely from black cast dense polyurethane using precision injection mold tooling.

The black floor mat is a one piece floor section that covers the driver's / passenger's footwells and the gearbox tunnel. This design feature ensures maximum soundproofing and heat suppression.

The black one piece seat box cover encases the 3 open sides of the seat box to also greatly reduce noise and heat.

This kit is available for both Defender NAS and ROW models with LT77, R380 manual transmissions and ZF Automatics.

NOTE: Some trimming is required when installing the Black Molded Matting Systems in LT77 and Automatic transmissions. The kit is also supplied with a bulkhead panel and the seat box cover is one piece and will require specific fitting.

Defender 90 Fabric Soft Tops

Constructed with superior quality fabric that will not fade, shrink or crack like the original. Year after year this top will look as good as the day you first put it on. Superior features include: weather secure door seals, heavy duty zippers & large HD Permaclear windows for improved visibility. An awesome fit on your existing belt rail system, this top ends the headaches of stretching and prying and keeps you dry and happy when the weather is foul. Includes three zip out windows, protective carrying pack and instructions. Made in the USA. **To determine your current style, visit our website.**

Pro Sport + 2 inch Shocks

Exclusively designed for off-roading Land Rovers. This is a true +2" longer than standard shock. The advantages when driving off-road are remarkable as these shocks are built with hardcore use in mind. Fitted with velocity sensitive valving means the shock will automatically adjust its internal damping to suit driving conditions, the harder you punish them the better they work. On the drive home you'll really notice the superior ride quality and handling.

NEW Gas Pressurised Shocks for Defender

The first comment we receive from guests who test drive a new Defender is about how well it rides and handles. We got so many requests from owners desiring to improve their suspension to the level of a new Defender that we started stocking the latest and greatest Land Rover shocks. These all new Land Rover Genuine shocks feature the latest nitrogen gas pressurized valving technology for superior suspension performance. So if you have had enough of aftermarket replacement shocks and long for something better, you won't be disappointed. Compatible with both standard and heavy duty rated springs. Supplied as each, complete with bushings and mounting hardware.

Genuine Shock & Spring Kits

The first comment we receive from guests who test drive a new Defender is about how well it rides and handles. We got so many requests from owners desiring to improve their suspension to the level of a new Defender that we started stocking the latest and greatest Land Rover shocks. Land Rover Genuine Suspension components feature superior performance variable rate coil springs and Genuine shocks feature the latest nitrogen gas pressurized valving technology for overall superior suspension performance. So if you have had enough of aftermarket replacement suspension kits and long for something better, you won't be disappointed with Genuine Land Rover parts. Each kit includes four Genuine coil springs and four Genuine shocks for a complete replacement matched set, shock mounting bushings and hardware included.

Genuine kit shown above

Defender 110, 130 Rear Heavy Duty Inner Coil Spring Kit

Update your Defender 110 or 130 to the ultimate heavy duty rear suspension. This inner coil kit inserts into your existing heavy duty rear springs. Improves handling on-road and increases load capacity without the harsh ride. **Kit contains two rear inner coils, upper and lower retainers.** Genuine parts. Fits Defender 110, 130 only. **RNK5119 \$ 499.00**

Close Encounters of the Royal Kind

by Jeffrey Aronson

Above: James, Pippa Middleton. Photo: Land Rover

L-R: Cayman Terbrock, Pippa Middleton

Photos: Donna House.

The 33rd Race Across America featured over 50 teams and many individual entrants, all traversing the US from Oceanside, CA, to Annapolis, MD, during June 2014. This year an eight-person bicycling team raised money on behalf of the Michael Matthews Foundation, an educational non-profit named for a Mount Everest climber who died during a 1999 attempt. Pippa Middleton and her brother James (whose sister Kate now sits as the Duchess of Cambridge) added name recognition to this British endeavor. Their support vehicles came in the form of Land Rover LR4's.

The eight-member British team divided itself into two groups, riding six hours each, and when resting shared driving duties in the Land Rovers provided through Land Rover North America. Without question, their most spectacular moments came when they crested the western US mountain ranges. In shades of the past, famous Camel Trophy events, they had to endure sleep deprivation, uncooperative weather and a tight schedule.

Unlike most American celebrities engaged in similar efforts, this team rode without formal security and with minimal fanfare. That proved to be a boon for Cayman Terbrock, age 9, who spent vacation time with her grandmother, Donna House, at Lake Sherwood, MO. Cayman adores the Royals ("She watched the Royal Wedding at 4 in the morning," her mother Lisa said), so you can imagine her excitement as the Race Across America riders whizzed by in rural St. Charles County. When the support vehicles stopped to make a rider change, Pippa Middleton stepped out of the Land Rover. Cayman recognized her and waved; Lisa told us that, "Cayman will forever remember her as being so nice and friendly. Pippa asked her many questions about her thoughts on the wedding and also asked her to cheer on her brother James as he rode by."

Congratulations to the British team on their accomplishments, a tip of the cap to Land Rover North America for their support, and to Cayman Terbrock. She will have the most enticing "What I Did This Past Summer" essay when she enters fourth grade next fall. ■

Going Green

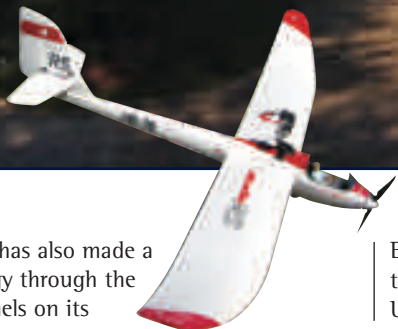

Photos: Kevin King

Land Rovers have always looked good in green; turns out Rovers North and Jaguar Land Rover look good in “green” too.

This past spring Rovers North worked with DC Energy of North Hero, VT, to install 156 solar panels on the roof of the company’s main building. Together they produce approximately 45,000 kilowatt hours per year, about 100–115% of Rovers North’s energy needs. Rovers North’s Mark Letorney noted, “Our mission is to support the Land Rover community; we also want to be a socially responsible company and reduce our carbon footprint.”

Over in the UK, Jaguar Land Rover just announced that it has also made a corporate investment in solar energy through the installation of an array of solar panels on its

Aerial photography accomplished using a sailplane carrying a GoPro® Hero3 camera.

Engine Manufacturing Centre. It’s the largest solar panel installation in the UK and it helped JLR become the first manufacturer to win the UK’s “Responsible Business” award. **///**

Employee Profile

Buck Kempner

It's a given that when you work at Rovers North you have an appreciation for and knowledge of Land Rovers; it also helps when you have a degree in Mechanical Engineering.

Alan "Buck" Blaine Kempner was born and raised in Cornville, AZ, a small town near Sedona. He graduated from the University of Colorado with his newly-minted B.S. degree and took his skills to the Moab 4x4 Outpost. There he fabricated parts for custom 4x4 vehicles, as well as Land Rovers. He later returned to Boulder where he worked in flow meter product development for Emerson Process Management.

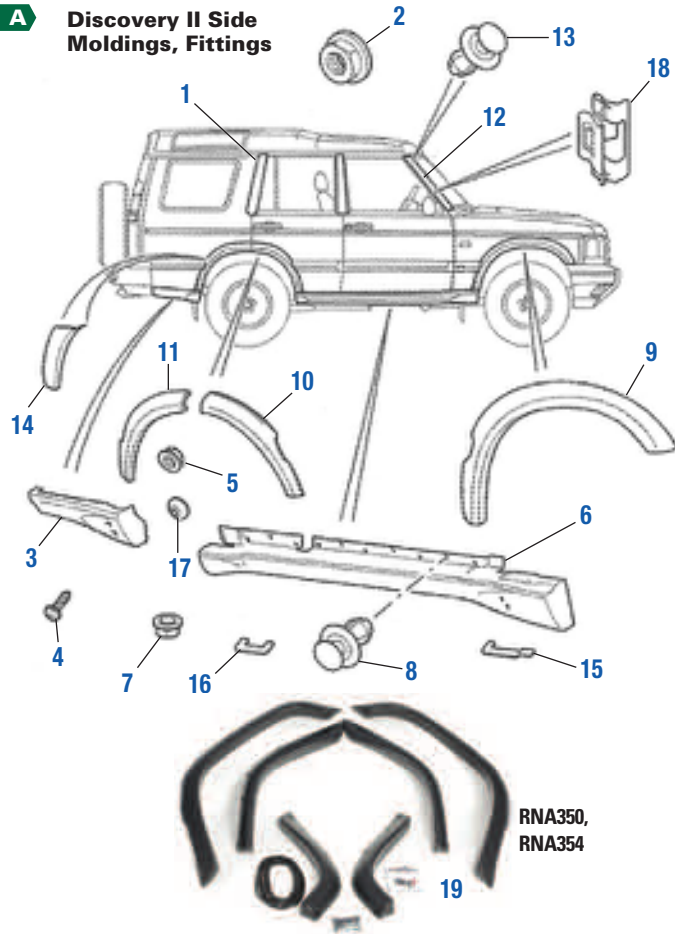

Buck might have remained in the West, except for the influence of his girlfriend, Maddie Monty, who grew up in Milton, VT, the next town over from Rovers North's Westford. Together they decided to move to Vermont and Buck joined the enthusiasts at Rovers North.

His principal role at Rovers North is product development. Input comes from sales techs, who note customer requests, and from Rovers North's procurement team of Mark Letorney, Dirk Parkins and Arthur Patsouris. "My tasks are to create a prototype of the item, determine manufacturing methods for in house fabrication or to set parameters for outsourcing manufacture. I'll also help test the prototype to make certain it meets Rovers North standards." As a recent example, when Land Rover made Series Land Rover fuel lines NLA, Buck created a set of fuel line prototypes and specifications for manufacture. This brings another set of essential maintenance items back into stock, so once again you can purchase the fuel lines cut to size with the correct stock fittings.

Buck also serves as a sales tech, assisting enthusiasts over the phone and online to get the most from their Land Rovers. "I really like the work climate and environment at Rovers North, and have fun getting to know the enthusiasts who rely on us." Buck attended this year's Maine Winter Romp and hopes to make it to events in Virginia, Arizona and Texas in the future.

Most of all, he enjoys Land Rovers. "I like the heritage Land Rovers like Defenders and Discoverys. The older you go with Land Rovers the more you feel like they were designed to live forever." The next time you call Rovers North, Buck will be happy to help you keep your Land Rover at its best.

Sightings

This summer has brought early storms, floods, drought, and sun, warmth and beautiful weather. In between weather extremes, Land Rover enthusiasts gobbled up cyberspace with dozens of Sightings. In case you need to review the rules, they are as follows:

Rule #1 - All Sightings receive recognition and our appreciation, but not necessarily a mug. We reward only those Sightings that capture the unique qualities of Land Rovers and their owners, and display them in a distinctive way.

Rule #2 - If your Sighting doesn't really surprise you, it won't surprise us, either—thus we can't award you a mug. We're delighted, but not surprised, that Land Rovers appear in British television programmes, British publications, films with British themes, and shows about African safaris. You shouldn't be surprised, either, and should consider looking for other ways to get a coffee mug.

Rule #3 - At an ever-changing date before publication, we close off the Sightings; for this issue it was May 30th. If we've mentioned the Sighting in an earlier issue, we might not mention it again. If you're new to the family of Land Rover enthusiasts, you may not have seen your Sighting in an earlier issue.

Rule #4 - We're not outfitting your kitchen. If you qualify, one mug per Sighting per issue.

Rule #5 - Sightings that are Land Rover references in books go to our Literary Land Rover editor for mention, but only when space permits.

Rule #6 - Psst... if we can't read your name and address because of atrocious penmanship, we can't recognize your Sighting nor send you a mug. Psst...Email submissions—remember we can't send a mug by e-mail. Send us your real name and shipping address, too.

Rule #7 - Grudgingly, very grudgingly, the Editor admits he might make an error. Let me know if you think you've been jobbed, but all decisions of the Editor are final.

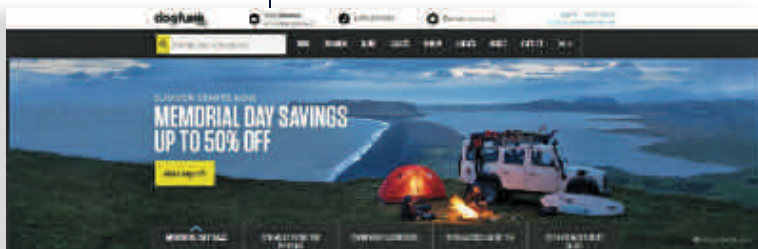

Although it's incorrectly identified as a "Range Rover Discovery" engine, Robert Sansone, Fiskeville, RI, watched a Sawblade.com video on YouTube of a V-8 being sawed in half. Lawrence Bart, Aspen, CO,

and Mike Jablonski, Longmont, CO, were surprised to see a Defender 110 on eBay's homepage in a blog about living in your vehicle. We have no idea what dog-funk.com sells, but seeing a Defender 110 in a camp setting on their homepage made him want to open his wallet, wrote Dan Duncan, American Fork, UT.

Thompson Smith, the visual artist who serves as Art Director for this magazine, found a Defender 110 via Google Maps street view while planning his California vacation. Speaking of vacations, our fabulous warehouse crew at Rovers North submitted the video of Ray Steven's camping trip with its several references to Land Rovers. Dave Lochridge, Rialto, CA, spotted a Defender used to illustrate a DailySignal.com post on the coal industry in the US.

Land Rover visuals always attract viewers, who might then become customers. Daniel Smith, Coventry, RI, spotted the 109" in the Travelocity ad. Buzz Dozier, Jacksonville, FL, noted a Land Rover in a Bloomingdale's ad in *Trend Magazine*. Frank Twarog, Hinesburg, VT, noted the Santana on the cover of the Rohan catalogue. Bo Prillaman, Irvington, VA, and Ross Newcombe, Wasilla, AK, spotted the Land Rover in an AT&T ad run during the Masters Golf tournament. Eric DePetris, Middleburg, FL, and Charles Bell,

Mobile, AL, spotted Joe Montana driving a Range Rover in a commercial for Sketchers. Intel featured a Land Rover at work in Africa in a recent ad, as noted by Jay Geaney, Cabot, AR,

Brian Jordan, Centennial, CO, John Karlsson, Hope Valley, RI, Michael Ullman, New Braunfels, TX, Ron Dade, Washington, DC, George Ellis, Massapequa, NY, Heath McGuire, Conyers, GA, and Chris Vitale, Plymouth, MI. Terry Imms, Revelstock, BC, Canada, noted that a Travelocity ad has a Land Rover in an African setting.

Jeffrey Austin, Chesapeake, VA, noted that Series Rovers populate the catalogue for climbing gear company CMI. William Ruttan, Palm Springs, CA, noted that his Fresh and Easy cookie packages have a cartoon Land Rover filled with African animals on the package.

John Cockell, Hollis, NY, received a Royal Bank of Canada leaflet promoting travel on safari using a Defender, of course. Greg Hollingsworth, Colchester, CT, found a Falken Tire ad that featured a Defender 110 connect-

ing you with conquering Mount Everest. Skyler Neibaur, Flower Mound, TX, found a Gymboree kids shirt with a Defender loaded with camping gear.

Magazine editors know that Land Rover images draw readers like flies to sugar. Marty Kilcourse, Stratford, CT, noted the Defender on the cover of *Kinfolk* magazine. John Cockell, Hollis, NY, enjoyed seeing a Series II-A 109" converted to an ice cream truck in the French

magazine *Universland*—“life’s two pleasures combined into one!” When designer David Netto was written up in the *T Magazine*, the *New York Times* style magazine, the photographers set up a photo shoot of his family in their Defender 110. Richard Brandorf, Wichita, KS, noted the impactful photo.

Television programs and movies often gain viewers just by adding Land Rovers. Terry Imm, Revelstoke, BC, Canada, watched Barry of “Barry’d Treasures” stumble about in a Defender 110. Steve Bradke, Niskayuna, NY, noted a Freelander in an online Facebook post. Manuel Mier, San Antonio, TX watched Series Rovers in the movie *Transcendence*.

Jason Sheehy, Mount Sterling, OH, Peter Haarala, Elko, NV, Heath McGuire, Conyers, GA, and Dennis Saltys, Burien, WA, noted the Defenders in Africa in the movie *Blended*. Mark Kellgren, Charlotte, NC, spotted a Series 109 in the promo for *Fallen Skies*; when the world around you collapses,

Travelocity
Roaming
Gnome: “Safari”
Commercial.

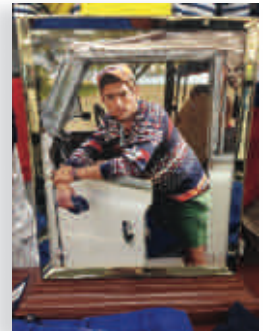

you want to rely on a Land Rover. Chad Davis, Charleston, SC, and Dan Easley, Albuquerque, NM, noted that it’s an early Defender that transports humans in *Dawn of the Planet of the Apes*. Matt Spetz, Forestville, CA, enjoyed watching an Africa Channel program called *The Marley’s Africa Road Trip*, in which the family retraces Bob Marley’s visit to honor Zimbabwe’s independence.

Blended movie
starring Adam
Sandler and
Drew Barrymore.

We’ve mentioned these Sightings before but we want to commend Greg Knighton, Pocatello, ID, Sarah Rickert, Jonesboro, AR, Glen Harms, Galena, IL, George Pathmer, Long Beach, CA, Ron Dade, Washington, DC, Rebekah Sanderlin, Niceville, FL, Marc Surber, Westborough, MA, Allen Minner, Carnation, WA, Colin Spencer, Palm Harbor, FL, Leslie Bright, Kingsport, TN, and Greg Fitzgerald, Warren, NJ, for spotting the Defender in the Allegra commercial. Leslie Bright, Kingsport, TN, Sarah Rickert, Jonesboro, AR, and Mike Murdock, Bellevue, WA, saw the Series Land Rover in an Orvis catalogue and online ad. Daniel and Joanna Cotes [see Rule #6] and Howard Morrison, Savannah, GA, found a Series Rover in the Kevin’s catalogue. Dutch Holscher, Columbia, SC, spotted the Land Rover in the Brooks Brothers catalogue. C.S.

Nagi, Houston, TX, Gus Davino, Short Hills, NJ, and Maj. Jonathan George, stationed on Okinawa, Japan, enjoyed the Land Rover poster on display at different Ralph Lauren stores. Orvis has similar type displays in its New York store, wrote Gus Davino, Short Hills, NJ. Pottery Barn returns Land Rovers into its catalogues, noted Cooper Conn, Snohomish, WA. 🇺🇸
